1.85-quence 8, Application US/08462859A

Patent No. 5652092

GENERAL INPORMATION:
APPLICANT: Jacobsen, J. S.
APPLICANT: Vitek, M. P.
TITLE OF INVENTION: Using Same to Access Agents Which Down-Regulate Formation
TITLE OF INVENTION: of B-Amyloid Peptide
CORRESPONDENCE ADDRESS:
ADDRESSEE: American Cyanamid Company
STATE: New Jersey
CCUNTRY: United States
INITY: Wayne
STATE: New Jersey
CCUNTRY: United States
INITY: ONE COMPATE: Floppy disk
COMPUTER: EMP FC-DOS/MS-DOS
SOFTWARE: Petentin Release #1.0, Version #1.30
CURRENT APPLICATION NUMBER: US/08/462,859A
FILING DATE: 05-UUN-1995

Sequence 6, Application US/08464247A

Sequence 6, Application US/08464247A

Patent No. 569347

GENERAL INFORMATION:

APPLICANT: Jacobsen, J. S.

APPLICANT: Vitek, M. P.

TITLE OF INVENTION: Using Same to Access Agents Which Down-Regulate Formation

TITLE OF INVENTION: of B-Amyloid Peptide

NUMBER OF SEQUENCES: 19
                                                                                                                                                                        5710
                                                                                                                                                                                                       3900
                                                                                                                                                                                                                                      5770
                                                                                                                                                                                                                                                                                                                               4020
                                                                                                                                                                                                                                                                                                                                                              5890
                                                                                                                                                                                                                                                                                                                                                                                                                           5950
                                                                                                                                                                                                                                                                                                                                                                                                                                                          4140
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         6010
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        4200
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       6909
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      4260
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   6129

APPLICANT: Vitek, M. P.

TITLE OF INVENTION: No. 5693478el Amyloid Precursor and Method of
TITLE OF INVENTION: Using Same to Access Agents Which Down-Regulate Formation
TITLE OF INVENTION: of B-Amyloid Peptide
NUMBER OF SEQUENCES: 19
CORRESSES:
CORRESSES: American Cyanamid Company
STREET: One Campus Drive
CITY: Paralippany
STRIET: One Campus Drive
CITY: Paralippany
STRIET: New Jersey
COUNTRY: United States
ZIPME: New Jersey
CONPUTER: IBM PC Compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.30
CUMRENT APPLICATION NUMBER: US/08/464,247A
ATTORNEY/AGENT INFORMATION:
NUMBER: Barnhard, Elizabeth M.
REGISTRATION NUMBER: 31,688

RESULT 1

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
